perform any action
playAction()
playAction()
actionComplete()
processEndTurn()
endTurnOutcome(): GAME_OVER
endGameScoring(List<Player> players)
to recount the score of each Player
applyScoring(players)
scoringApplied()
to add bonus score to the Player with longest continuous path, both Players are awarded bonus score if each has the same length of longest continous path
applyScoring(players)
[if hasLongestRoute(Player) == true]
setHasLongestRoute()
longestRouteSet()
scoringApplied()
applyScoring(players)
setTotalDestCompleted(int)
totalDestCompletedAdded()
scoringApplied()
to add/deduct score based on DestinationTicketCard hold by Player
endGameScoringApplied()
Interaction in selecting winner for the game
Alternative
[if only 1 Player has highest score]
Player with the higher score is the winner
notifyWinner()
showWinner()
[Else] both Player have same score
Loop
for each Player
12.1 getTotalDestCompleted()
12.2 totalDestCompleted: int
Alternative
[if totalDestCompleted of each Player is not same]
Player with the higher number of DestinationTicketCard completion is the winner
notifyWinner()
showWinner()
[Both Player have the same number of DestinationTicketCard completed]
Loop
for each Player
getHasLongestRoute()
hasLongestRoute: boolean
Alternative
[if only one Player hasLongestRoute: true and another hasLongestRoute: false]
Player with the LongestContinousPath award is the winner, if the other one is not awarded
notifyWinner()
showWinner()
[Both Player hasLongestRoute: true]
If both Player is awarded LongestContinousPath, the game is Draw
notifyGameDraw()
showGameDraw()
